## By Topic

Our topical index provides a key to essays, editorials, and some more significant "Mailbox" items, with writers identified by surnames in the case of essays, "Ed." for editorial, and "MB" for writers of "Mailbox" letters.

Topical headings are chosen with a view to practical usefulness. They do not always reflect scientific classification.

We have tried to identify each piece according to its principal thrust, and sometimes we have made double listings. Items are listed under Bible text only when they are clearly exegetical.

We suggest that the user review the entire list of categories.
